ENERGYST CAT RENTAL POWER IS YOUR PARTNER FOR EVERY PHASE OF THE OFFSHORE WIND FARM LIFE-CYCLE

AT ENERGYST, WE RECOGNISE THAT EACH STAGE OF WIND FARM DESIGN HAS ITS UNIQUE CHALLENGES. AS A SUBSIDIARY OF CATERPILLAR AND ITS DEALERS, WE HAVE A VAST EXPERIENCE AND AN IN-DEPTH UNDERSTANDING OF THE TEMPORARY POWER AND TEMPERATURE CONTROL NEEDS OF WIND FARMS. NO MATTER WHAT THE APPLICATION, YOU CAN RELY ON ENERGYST TO BE YOUR PARTNER FOR POWER, COOLING AND HEATING RENTAL SOLUTIONS THROUGHOUT YOUR WIND FARM LIFE-CYCLE.

Space and weight are critical factors for offshore wind farms, during the construction and commissioning phases as well as whilst in operation or maintenance. Exactly the type of challenge that inspires our application engineers to develop innovative rental solutions.

Vast experience in offshore power projects

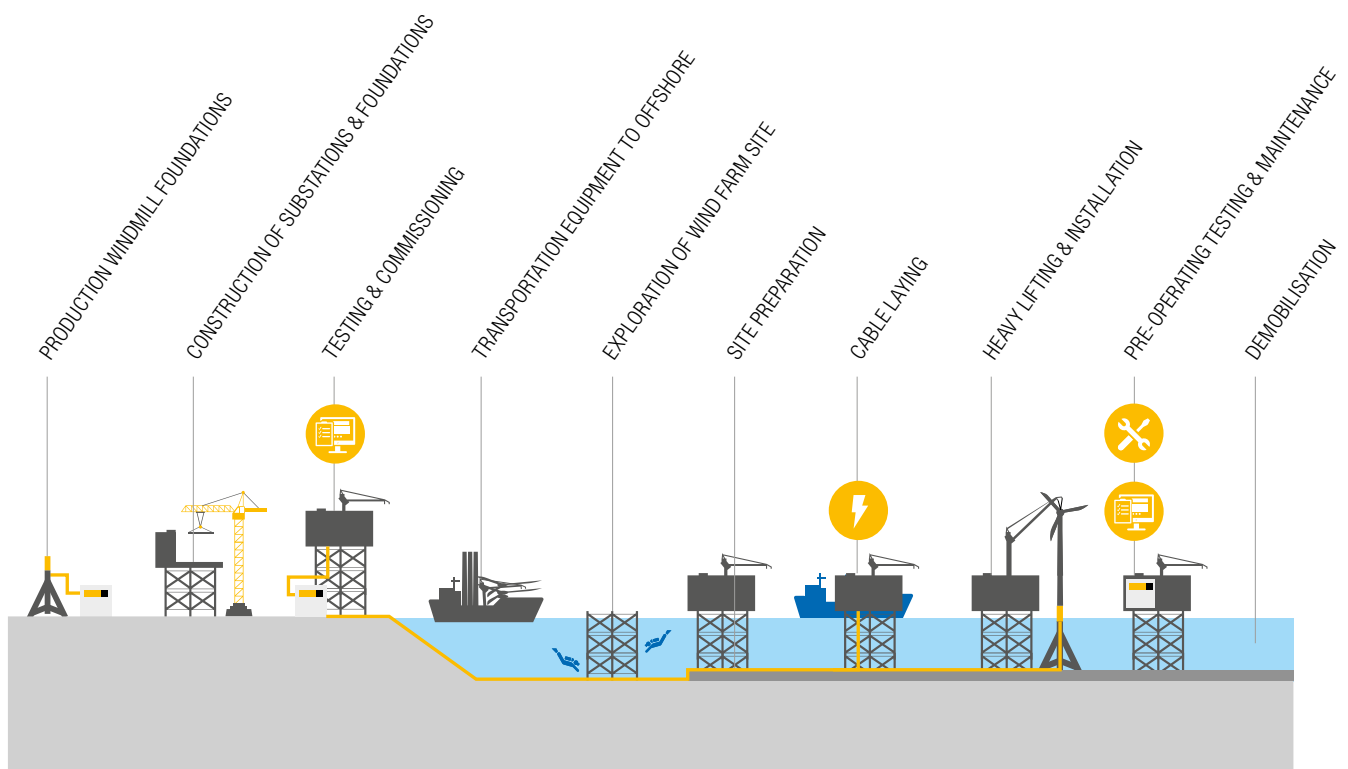

With our vast experience in power projects for the oil & gas and marine industries, EnergySt has both the equipment, and the knowledge and expertise required to meet the harsh conditions and the stringent standards of the offshore wind farming industry.

Full range of temporary power solutions

EnergySt's rental fleet contains diesel generators ranging from 30 kVA up to 1700 kVA. Our NORSOK XQ1700 diesel generator is one of our fine examples of revolutionary engineering: EnergySt is one of very few power rental companies worldwide offering 1700 kVA in a 20-ft container.

Custom designed & built rental equipment

If our standard equipment does not suit your requirements, we will custom design and build the equipment you need. Quality and reliability, developed in close cooperation with our partner Caterpillar.

WHY CHOOSE ENERGYST

SAFETY & RELIABILITY

- Energyst is a subsidiary of Caterpillar and its dealers
- Wide range of portable power, heating and cooling equipment
- Rig safe and NORSOK DNV 2.7-1 certified offshore generators
- Wide range of ancillaries (transformers, fuel tanks, switch gear, cabling etc.)

TOUGH STANDARDS

- Offshore certified technicians
- Specially designed heavy-duty offshore equipment
- ISO & OHSAS-compliant solutions
- Achilles Sellihca & UVDB accreditations

INNOVATIVE SOLUTIONS

- Offshore generators with capacities from 30 kVA up to 1700 kVA
- Space saving innovation: 1700 kVA genset in a 20-ft container
- Multi-voltage (400-690V) and multi-frequency (50-60 Hz) solutions
- Targeted electrical distribution

YOUR PARTNER AROUND THE CLOCK

- 24/7 emergency response
- Remote monitoring
- Full range of power equipment including load banks and transformers
- Dedicated offshore branches throughout the North Sea region
- Vast experience serving the needs of the offshore industry
- Technical consultation, site surveys and risk assessments
- Project management & turnkey service
- Customised equipment packages
- Global coverage through Energyst and Caterpillar dealer network
- Single point of contact for projects across the globe
- Long term rental rates
- Support and solutions for repair, maintenance and modification

OUR RENTAL SOLUTIONS

WHATEVER TEMPORARY POWER, HEATING OR COOLING YOU NEED FOR YOUR WIND FARM, ENERGYST CAN HELP. WE HAVE GOT THE QUALITY EQUIPMENT AND THE EXPERTISE TO FIND THE SOLUTION THAT MEETS YOUR REQUIREMENTS.

REAL ENERGY COMES FROM ENERGYST

POWER RENTAL SOLUTIONS

- CAT power generators up to 2000 kVA
- CAT NORSOK and Rigsafe offshore power generators up to 1700 kVA
- Load banks
- Transformers
- Cables
- Fuel tanks
- Distribution gear

COOLING RENTAL SOLUTIONS

- Air conditioners
- Air coolers
- Air cooled chiller units (AC)
- Water cooled chiller units (WC)
- Air handlers
- Heat pumps

HEATING RENTAL SOLUTIONS

- Air heaters
- Hot water systems
- Heat pumps
- Heat exchanger systems
