

ENERGYST FUEL TANKS SPECIFICATION

FUEL TANKS 1,000 – 27,000 LITRES

OUR FUEL TANKS ARE SPECIALLY DESIGNED TO COMPLEMENT OUR POWER GENERATION AND TEMPERATURE CONTROL RENTAL FLEET

For an efficient operation of our generators Energyst offers a range of ancillaries for rent, including efficient and environmentally-safe diesel fuel tanks. Our range of fuel tank hire solutions is UN compliant and in conformity with IBC environmental regulations. They allow environmentally safe supply of fuel to Energyst equipment where an auxiliary source is required or if the equipment's own internal tank does not allow sufficient running time.

The robust CSC plated, pressure tested containers are equipped with quick release couplings, fork lift pockets on four sides and a lockable, vandal-proof access hatch. They ensure safe and secure containment of bulk fuel supplies for generators, heaters and hot water systems.
