CATERPILLAR®

WE ARE ENERGYST. POWERED BY CATERPILLAR

POWER AND TEMPERATURE CONTROL ARE VITAL TO PROTECT THE SAFE AND EFFICIENT OPERATION OF YOUR PRODUCTION LINES AND PROCESSES. FROM PROVIDING A RELIABLE SUPPLY OF POWER FOR MISSION-CRITICAL EQUIPMENT, TO MAINTAINING OPTIMUM TEMPERATURES DURING THE COOLING SEASON. BECAUSE WITHOUT POWER YOUR INDUSTRY COULD GRIND TO A HALT. WHAT IS MORE, UNEXPECTED FAILURES AREN'T JUST COSTLY IN TERMS OF YOUR FINANCES, THEY MAY ALSO DO UNTOLD DAMAGE TO YOUR REPUTATION. SO WHEN YOU NEED A POWERFUL SOLUTION THAT YOU CAN REALLY RELY ON, IT PAYS TO GET REAL ENERGY FROM ENERGYST.

Trust us for CAT Rental Power

Energyst CAT Rental Power is one of the world's leading providers of power and temperature control rental solutions. In fact, when it comes to equipment hire, we are CAT rental. As a subsidiary of Caterpillar dealers and Caterpillar Inc., our extensive range of world class rental equipment includes everything an industrial plant or manufacturing facility could possibly need. From power generators and load banks to energy-efficient heating and cooling solutions on an industrial scale. And if the world's leading manufacturer of diesel and natural gas engines can trust Energyst with their reputation, it goes without saying that you can rely on us too.

International expertise, local know-how

Thanks to our special relationship with Caterpillar, Energyst can provide a unique level of service too. Whether you need a solution that you can roll out across an international network of facilities, or a one-off solution for a temporary production process, no one is better placed than Energyst to help you. Not only can our branches be found across the globe; we also work in close collaboration with the many Caterpillar rental partners globally. Which means that unlike other rental companies, we can genuinely think globally and act locally.

INDUSTRY

TOTAL SOLUTIONS FOR TOTAL PEACE OF MIND

THE LIFEBLOOD OF AN INDUSTRIAL PLANT OR FACILITY IS THE ENERGY THAT PROVIDES THE LIGHT, HEAT AND POWER TO KEEP THINGS WORKING. WITHOUT ENERGY THERE IS NO PRODUCTION. IT'S AS SIMPLE AS THAT. SO YOU NEED A SOLUTION THAT WILL MAINTAIN UNINTERRUPTED, COST-EFFECTIVE POWER TO KEEP YOUR PRODUCTION LINES MOVING AND CONTROL COSTS. EVEN MORE SO WHEN YOU'RE FACED WITH AN EMERGENCY. WHICH MEANS YOU ALSO NEED A PARTNER THAT YOU CAN RELY ON FOR ANY BACK UP, PLANNED DOWNTIME OR UNEXPECTED POWER FAILURES. BECAUSE LOSS OF POWER OR INADEQUATE TEMPERATURE CONTROL CAN DO UNTOLD DAMAGE TO CRITICAL PRODUCTION PROCESSES, NOT TO MENTION HIGHLY EXPENSIVE SPECIALIST INDUSTRIAL EQUIPMENT. ENERGYST WILL PUT REAL ENERGY INTO ENGINEERING A TOTAL SOLUTION.

EVERY MINUTE OF DOWNTIME AT YOUR FACILITY COSTS MONEY. THAT'S WHY YOU NEED EXPERT TECHNICAL AND COMMERCIAL SUPPORT RIGHT AROUND THE CLOCK.

Maintaining production isn't just a concern for factory owners and industrial facilities; it can often be vital for the economy. So whatever your industry or specialism, whether it's automotive or engineering, manufacturing or software, a reliable power supply and temperature control is critical for maintaining your industrial plant and production processes. That's why it's vital that you choose the right partner to meet your needs. One that understands your business inside out and can get right to the heart of each and every challenge that you face. No-one puts more energy into finding the right solution than Energyst.

A unique approach to industry

When it comes to power and temperature control, no two industry sectors, or production facilities, are ever the same. That's why we approach each project with a fresh pair of eyes. First, our highly qualified application engineer will arrange an on-site visit to evaluate your facilities and discuss your needs. Because although you may have an idea of the power supply you'd like to use, we can often use our expertise to deliver a better solution than the one you've asked for.

Unrivalled expertise in design and engineering

The next stage is to plan and design a solution that meets your unique needs. We tackle this in great depth, taking into account how your power supply will be used, the levels of energy efficiency you need to achieve and the most effective way to deliver it. Our engineer will draft how the solution will be built on site. We'll also compile a detailed checklist for equipment, ancillaries, procurement and project logistics - plus the all-important costs.

WE'LL PUT REAL ENERGY INTO MANAGING YOUR TOTAL PROJECT

A dedicated team

After any fine tuning and your final approval, we'll assign a dedicated project manager – someone who can lead the project on site. Our team of technicians will receive a work order for the project with an itemised materials and task list. They will also complete an on-site worksheet for you to sign off, so you can see what work each technician has carried out.

Flexible solutions

With our range of flexible packages we can create a bespoke solution that's tailored to your exact needs. And no project is too big or too small. We put Real Energy into providing every solution from dry hire of a single generator to a turnkey solution that includes planning and logistics, tailor-made equipment, fuel management and insurance. A solution that you can take day-to-day control of, or our experts can manage for you. Whichever suits you best.

Power you can trust

Whether it's power for temporary equipment, planned downtime for maintenance or a one-off procedure that requires additional capacity, Energyst has the solution. Our high quality equipment includes generators, transformers and load banks to cover peak load for power (and power for temperature control). And for added reassurance we have the CAT Twin Pack for synchronised, automatic back up should one generator fail.

Caterpillar quality

Caterpillar is the brand of choice for quality, performance and reliability. As a subsidiary of Caterpillar Inc., we are CAT Rental Power. Not only can we supply the entire range of CAT generators, we also have a close relationship with the global network of CAT rental dealerships. Renting offers you an extra financial advantage too. No capital expenditure is required and you can control the type of equipment you use and how long you use it for.

Critical cooling solutions

We can also meet all your cooling requirements. Our expertise and equipment covers everything from air handlers for maintaining critical temperatures to self-contained chillers that providing chilled liquid for process cooling or extra cooling for production capacity. Our air coolers and chillers are also perfect for keeping staff and storage areas cool. What's more the coolant in our equipment meets all European standards, ahead of the planned phasing out required by legislation.

Heating and hot water

Our design and engineering expertise also extends to heating and hot water. We have a wide variety of solutions to boost temperatures during the winter months, as an emergency back up in the event of a central heating breakdown, or to heat storage areas and temporary construction sites.

Quality and safety

All our engineers are highly qualified. We also respect all European electrical standards and legislation. Should our engineers need to visit or work on site, we'll ask for your safety rules in advance to ensure they have the correct protective clothing. We'll also check if you have any special requirements such as X areas and designated zones that should be avoided.

Rapid deployment 24/7

We understand that every minute of downtime at your industrial facility costs money. That's why you need expert technical and commercial support right around the clock. You can speak to Energyst 24 hours a day (and it is us – not a call centre). So when you need help you can get the expertise you need to keep the wheels of your industry turning.

WE'RE
HERE
TO HELP

At Energyst we understand that no two industries are ever the same. So if one of our standard solutions doesn't quite meet your needs, we'll create a customised solution that's tailored to your exact requirements. To find out more about our design and engineering expertise, or to ask our advice on power, heating or cooling, call 00800 3637 4978.

We'll put all our energy into helping you find the right solution.

OUR SOLUTIONS

WHATEVER POWER, HEATING OR COOLING YOU NEED FOR YOUR INDUSTRIAL FACILITY,
REAL ENERGY COMES FROM ENERGYST

POWER SOLUTIONS

From a sudden power failure to a planned shutdown, temporary power for a small-scale project or a long-term solution for a mega plant, Energyst can help. We have a range of Caterpillar generator sets for every power solution. From a simple power set up to a multi-megawatt installation, our modular solutions work together to generate the power you need. So if you need 500kVa, simply rent four of our 125 kVA units.

Our power equipment includes:

- Power Generators up to 2000 kVA
- Cables
- Fuel tanks
- Distribution gear
- Load banks
- Transformers

COOLING SOLUTIONS

Whatever you need to cool, Energyst can also supply the perfect rental solution. We have the most up-to-date and efficient cooling equipment. Along with all the professional advice and expertise that will ensure your project is a success.

Our cooling equipment includes:

- Air conditioners
- Air coolers
- Air cooled chiller units (AC)
- Water cooled chiller units (WC)
- Air handlers

HEATING SOLUTIONS

Our heating solutions are useful for a diverse range of applications. Whether you need a temporary source of heat for an office or construction site, or need to heat a critical industrial process, Energyst has the heating systems, quality equipment and expertise you need.

Our heating equipment includes:

- Air heaters
- Hot water systems
- Heat pumps

Our knowledgeable and experienced staff are on hand to answer any questions or provide more information about how we can help meet your specific needs.
